FOR IMMEDIATE RELEASE

Boiler inspections in Arizona to change July 1st.

05/15/2017 - Due to the response the ICA has received regarding the opportunity for an entrepreneurial venture into boiler inspections, the ICA would like to follow up with more information to help those looking to pursue an opportunity in becoming a boiler inspector in Arizona.

1. The first step is to achieve certification. The National Board of Boilers & Pressure Vessel Inspectors has outlined the requirements for certification [here](#).
2. If you are a business that is already certified to do boiler inspections nationally, you can fill out the ICA application [here](#).
3. A list of boilers requiring inspection can be found [here](#) and will be updated monthly.

If you should have any additional questions, do not hesitate to email Randy Austin at Randy.Austin@azdosh.gov or feel free to check the boiler section of our webpage for further details at <https://www.azica.gov/divisions/adosh/boiler-section>.
