Chairman Schultz checked if representatives from Prescott Motors would like to comment.

Chairman Schultz checked if Ms. Bostwick would like to comment.
Ms. Bostwick thanked the Commission for the opportunity and emphasized what an amazing company Prescott Motors is, who takes care of their employees. If there is any leniency to give to Prescott Motors, she would appreciate that.

Chairman Schultz checked if anyone on the phone would like to comment.

Ms. Snyder, the owner of the company, did not quite understand what was happening in the inspection. She does have safety inspections for all of their tools before they go into work and reviews the jobsite and gives instruction to the employees before they start work and come back from lunch. She did not know how the wall fell, and she was the one that did the prior inspection but did not realize it was a fake wall.

Chairman Schultz thanked Ms. Snyder for her comments, and directed her to provide any abatement information to Mr. Atencio. The Commission is focused on trying to make sure
workplaces are safe and become safer after accidents like this happen but sometimes events like this are unforeseeable.

Commissioner Krenzel moved to approve the citation and proposed penalties as presented and Commissioner LeMarr seconded the motion. Chairman Schultz, Vice Chair Hennelly, Commissioner LeMarr and Commissioner Krenzel voted in favor of the motion. The motion passed.

Mr. Atencio advised that the next ADOSH Advisory Committee is on March 31, 2021, and based upon his research in this file, the Registrar of Contractors has only three contractors, one of which has a revoked license, who perform this type of work, so he is going to ask the Advisory Committee to think of ways to do outreach and provide more guidance and information that would prevent this from happening in the future.

Chairman Schultz noted it was not the first collapse and it is dangerous work. It’s not about the individual event, it’s about following through to try to improve safety throughout Arizona in all similar situations.

Mr. Atencio noted that Catalina Roofing had been part of the Roofer’s Alliance and there were no fall hazard issues and wanted the Commission to know that a lot of their efforts are coming through. Mr. Atencio discussed ADOSH’s investigation, summarized the citations and proposed penalties. Mr. Castillo was also available for questions.

Chairman Schultz checked if anyone on the phone would like to comment.

Commissioner Krenzel moved to approve the citation and proposed penalties as presented and Commissioner LeMarr seconded the motion.

Chairman Schultz appreciated Catalina’s participation in the Roofer’s Alliance and it’s obvious to see the progress they have made from the prior citations which were two years ago. He also appreciated all the PPE that Catalina is providing for their folks and that their program does require a medical evaluation. He pointed out the very quick abatement efforts, two weeks, in which the company was able to obtain the required abatement on these citations which is very responsive. He appreciates all of the efforts of Catalina and asked Mr. Atencio to take that under consideration.

Chairman Schultz, Vice Chair Hennelly, Commissioner LeMarr and Commissioner Krenzel voted in favor of the motion. The motion passed.
Mr. Atencio discussed ADOSH’s investigation, summarized the citations and proposed penalties, and reviewed the photographs.

Chairman Schultz commented that it was incredibly ironic to the impact that COVID has had on virtually all working environments. For instance this, this is basically an office which probably uses a service for their cleaning, so this employer probably has never before had hazardous chemicals to deal with. Now up pops COVID, and they implement an effective program and that includes the ability to sanitize surfaces and in fact using Virus Plus, which is very effective, but virtually all sanitizers contain either alcohol or other disinfecting chemicals that qualify as potentially hazardous chemicals. Here they are doing their best to comply with COVID-19 CDC regs and OSHA regs and can easily see you would not even think that that you need an eyewash station in a basically clerical area. It is interesting the overall impact of COVID had, the changes it has required and do not believe he had seen anywhere the CDC pronouncement or OSHA issued and you do not see it anywhere in the media, that these disinfectants that now we want you to use, can potentially require you do hazard communications, glove and gown people and provide eyewash stations.

Mr. Atencio noted that was a good point, and he has had multiple conversations with many different organizations, associations and individual employers and ADOSH has been doing as much education as they can to inform employers of 29 CFR1200(e)(1) for hazard communication.

Chairman Schultz commented that it is fascinating the direction this sometimes takes, and would encourage all of the compliance and consultation folks to do what they can to try and educate employers about this additional exposure that is created.

Commissioner LeMarr moved to amend the citation and proposed penalties to include a 25% Good Faith Reduction for a total of $3,000. Commissioner Krenzel seconded the motion. Chairman Schultz, Vice Chair Hennelly, Commissioner LeMarr and Commissioner Krenzel voted in favor of the motion. The motion passed.

Chairman Schultz thanked Mr. Atencio for the In-Compliance Report detailing the significant number of inspections that found employers were complying.
