Subject: Worker's Compensation
Date: Wednesday, May 10, 2017 3:35:04 PM

To our Arizona Colleagues;

Our clinics worker's compensation volume has decreased from 30% to 5% of our patient census. This is because we refuse to be paid at a large discount amounting to as much as 40 to 50%. The middlemen also have increased the administrative cost to provide care at the discounted rate. (authorization, denials and taking up to 6 months to pay for services rendered) We will maintain the quality of care our patients deserve and expect by not taking contracts which would contribute to the demise of our profession.

Sincerely,

Chris Ota, PT
